OONI | Explorer

Investigate Internet Censorship

What is OONI Explorer?

OONI Explorer is the world's largest open dataset on Internet censorship.

Since 2012, more than a billion network measurements have been published on OONI Explorer from more than 240 countries and territories.

Access OONI Explorer:
https://explorer.ooni.org/

Search tool

Use OONI Explorer to find data on:

- **Blocking of websites**

- **Blocking of instant messaging apps** (e.g. WhatsApp)

- Testing of **circumvention tools** (e.g. Psiphon VPN)

...and more!

Measurement Aggregation Toolkit (MAT)

Track Internet censorship worldwide and create charts based on real-time OONI data collected from around the world.
